

EMPLOYEE DATA WELLNESS

Protect the people behind your security systems.

Cluzy helps employees reduce exposed personal information while giving employers aggregate proof of participation and progress - without revealing private employee records.

THE BUSINESS PROBLEM

Attackers use addresses, relatives, phone numbers and personal history to make social engineering believable.

THE PRIVACY BOUNDARY

Employees control personal information and individual actions. Employers receive totals and trends only.

WHAT THE PROGRAM DOES

01

See

Help employees understand what personal information may be exposed.

02

Reduce

Support removals, corrections and practical privacy actions.

03

Repeat

Build healthier data habits instead of running a one-time deletion project.

04

Report

Show aggregate participation, actions and program progress.

Start with a focused 90-day pilot.

WEEKS 1-2

Prepare

Select a pilot group, sponsor, privacy promise and baseline.

WEEKS 3-6

Launch

Introduce the benefit, onboard employees and open personal actions.

WEEKS 7-10

Engage

Reinforce participation and reduce friction.

WEEKS 11-12

Review

Assess aggregate activity, employee feedback and annual fit.

WHY EMPLOYERS CONSIDER CLUZY

- Reduce personal-data exposure
- Support human-layer security
- Add a useful employee benefit
- See progress without surveillance
